

The task management software in your company

SDP Era job-IT

SDP Era job-IT is the ideal task management software for your company. SDP Era job-IT provides a clear view on who does what and when in your company. SDP Era job-IT operates perfectly as an independent application but it also fits into the complete Era picture: SDP Era time-IT (time registration), SDP Era plan-IT (timetable planning) and SDP Era pass-IT (access control).

Calculation of worked hours

In order to calculate a price for products or services, it is important to know how much time is spent on the production process or services. As a manager you need to know in detail how much time an order or file has taken up or how long your employees have worked on a project for a certain customer. In addition, you want to be kept informed on the number of worked hours: which part of the production process took up most time? How many hours do your employees spend on repairs or setting up machinery? Wasn't the presumed time exceeded per division? What is the employee's profitability?

SDP Era job-IT offers an answer to all these questions

By means of function keys on badge terminals, barcode scanners, mobile phones or computers, the employees register the beginning and end of a certain job. SDP Era job-IT then calculates the performances per job, employee, file, location or customer and provides online overviews thanks to the integrated report generator. SDP Era job-IT also offers the possibility of cost calculation, budgeting and project management.

Reports and statistics

Reports can be generated per file, employee, registered activity, location, customer, etc. The data can also be exported to Excel or to your ERP software by means of the export module.

SDP offers a global solution

SDP develops all software in-house and fully understand your requirements for specific solutions. That's why SDP

not only provides powerful software. Also for hardware and the corresponding services such as installation, training and consultancy you can turn to SDP. SDP Era job-IT links perfectly with other Era modules (SDP Era time-IT, SDP Era plan-IT and SDP Era pass-IT) in the same environment which makes double input redundant.

Want to know more?

Do not hesitate to contact us for further information. We will be glad to come over for a demonstration. Together we will find the most profitable solution for your company.
